Interconnection Application Process & Checklist

To begin the interconnection application process, please complete, sign, and submit the following documents:

- Interconnection Application
- Requirements Document
- Interconnection Agreement
- Applicable Rate Rider

Attach the following supporting documents:

- One-Line Electrical Diagram
- Proof of Homeowners Insurance
- Equipment Specifications:
    - Solar Panels
    - Inverter
    - Battery Energy Storage System (BESS)

Once Your Application is Approved:

- Pay the $400 interconnection fee
    - Instructions will be provided
- Submit photos of the installed system, including:
    - Wiring from disconnect to PV production meter
    - Wiring from PV production meter to utility meter
- Provide a copy of the passed electrical inspection report

Please Note: Per your request we can coordinate for a lineman to be onsite to assist with the tap piercing once the system is ready for connection.

After these steps are completed, the PV production meter will be installed, and a Permission to Operate (PTO) will be issued.
